The pretty school teachers, smiling as sweetly as ever, were on route to school this morning. They look all the better for their holidays.

Some people are wondering if that exclamation at the corner of Bridge and Parnassus has to be kept open indefinitely. It seems about as if the street was going to be put in a permanent condition again.

It looks, as far as, though Sunday, September was on the water waves.

Yesterday would have been a day to take Belleville's know. It would be interesting to know just how many of our citizens were in Toronto.

Lightning struck several barns in this locality. "Probably old Dave thought he might as well burn the barn as some farmers have taken to put in them, anyway."

One thing in connection with the Doomed Wife's Water Bill Englishmen seem to have overlooked: it is a man marries a family of sisters, one after another, he only draws one mother-in-law.

But is some other man that, while a man can now marry his deceased wife's water, a woman is still forbidden to marry her deceased husband.

The Mail and Empire pertinently points out that the name Laurier seems to be a joke. The Laurier device went down in Lake Ontario; the Laurier boat was full of boats; now the Laurier Bridge is a wreck at Quebec. And look at the state of Cabinet Minister who have joined the Laurier Cabinet and gone down.

It is to be hoped there is no truth in the rumour, which comes from the works of the Pioneering, The Bridge Company, that workers wrecked the Quebec bridge, it was an awful story to set off, it is a receipt upon authority.

Boy's Narrow Escape.

Harold Wheeler, 15-year-old son of Mr. Wheeler, had a very narrow escape on Saturday evening. He was in a car with other boys, in front of St. Basil's church, when, in some way, young Wheeler lost his balance and fell out of the car. He was picked up by a passer-by and taken to the hospital. He was released on Saturday evening, where the dirt was washed off his face, and it was found that he had sustained no serious injury, his face being scratched in a few places, and that was all, but he had a narrow escape.

RANGE

The easiest way to remove dirt from a range is to wash it with an ash pan from a Pandora method (see illustration).

Such an extra large pan is provided with the Pandora that will contain more suds than will accumulate in one day.

All the suds are in the pan, too, because they are guided there by flanges attached to either end of the fire-pot.

Least, cleanest, quickest, is the Pandora way.

With the scraper and pan provided with every Pandora it's merely a matter of a minute or so to clean out the dirt in the Pandora flues.

Least dirt accumulates in Pandora flues than in ordinary pans, because they are wider and deeper, with no projections or obstructions which prevent the dirt from being scraped out.

Bores a hot labor, does the Pandora way.

DANGEROUS PIGS.

Their habits are very peculiar.

A writer in the St. Louis Republic

describes the most vicious and ferocious

members of the brute creation in the

desecrated or wild land of America. This

animal shows untold degrees of ferocity

and is a complete nuisance in the

strange way in which it is able to

perform its complete lack of mental

abilities.

Their ability to hunt man is particu-

larly marked. The only thing it does

when it gets after you is to run

after you from man to man, and it

can carry you, and then there is no

chance for you, unless you are a

man of a very swift as a horse.

Their habits are very peculiar, as great

as their viciousness.

They are a very dangerous animal, and

TIMELY TOPICS.

Short scraps days are over now. There seems little talk with regard to it. It's going to be a winner. They say local merchants are going to be looked after in the coming week and handsome skirts.

The Sage of Thiruvai, "the sage" said down to Ottawa, and the Premier short hands with very busy hair.

The Great Sir Wilfrid shook my. At last it came out that only one of the Christ Church Bays, with manner.

Alma! Alma! It beats the head. He has got the whole again.

Now it's held that even in Ontario will not be so short as parliament asserted. Well, the crops may be a bit short, but the farmers won't be ill they can help it. They'll charge you and I enough to make up.

"Fanny" things" mangled the man on the next block, "but take the case of the average man. As a statesman, he is not so much interested in anybody getting the best of the other man's matter, but as a private citizen he will seek the city good and plenty every time he gets the chance. He's the same way with the Government, and, in fact, with all legislation. There seems to be no end of cities for private transactions and quite another for public use."

Issues are necessary if the interests of the city are to be properly looked after.

West Belleville man. "Why do they have to send the city water to Toronto to have it tested?"

"Best Belleville man." "Probably by some nobody in this city takes water."

Here's a pretty good job on the Ontario Girls. We heard a lot of talk about different Edward, poor girls who were "mentioned" for positions in the Laurier Cabinet.

At last it came out that only one of the Christ Church Bays, with manner.

Attacks on Japanese Caused No Surprise in London.

Outbreak Has Been Long Fanned—Yankee Samens Mobbied by Japs—Sailors Invited Trouble—Attack- ed Storekeeper—Two Had to Swim to Safety— Japanese Are Exonerated From Blame.

London, Sept. 10.—The news of the
attack on the Japanese sailors at
Vanconver did not surprise the
Consular and British Office officials
here, who had long feared an out-
break of this kind. The Japanese
in Canada, but they have the greatest
confidence in the ability of the Cana-
dians to suppress any disturbances.

At the same time, the official re-
action to the attack was not sur-
prised, particularly as the feeling ap-
parently was that the Japanese
of Great Britain's ally, and that
it required the most careful handling
for whatever action is taken is likely
to be directed either by the navy
or by Japan.

The incident has been under con-
sideration for some time by the Im-
perial War Office, and the British
good offices on numerous occasions
to prevent the carrying out of any
Japanese legislation by British Colum-
bia, which the British Government
was discussed at length during the
visit of the Canadian Government
to London, Australia being as much
a part of the Empire as Canada.

As the subject was allowed to pass
at the time, however, the British
Government has not been able to
all the Cabinet Ministers are not
of view, but the Colonial and Foreign
Offices are seeking to obtain all the
information possible on the subject
of the Vancouver outbreak, with the
view of taking some action, the
turn of which is difficult to surmise.

The Times, which has been re-
spondent severely and repeatedly de-
clined the late Franco-Japanese
to the Japanese, is the only paper
commenting on the incident, and
against the Japanese and Chinese at

ADVANCE WORD ABOUT FURS

For several years we have been doing a big business in Furs
and we expect this season to do a much larger trade in this line,
and have made preparations accordingly by placing large orders.

There are two main reasons why we have had up to large a fur business. We
buy only thoroughly reliable goods and we sell them at moderate prices.

There is perhaps no line of trade where more deception can be practiced than in
the fur trade. Extortionate prices are often asked for inferior quality. We only buy
the fur from firms that have a reputation for honesty and reliability, and we are able to
sell our furs with the utmost confidence that they are exactly as represented. At any
turn out to be what we represent them.

We will be pleased to have you consult concerning any of your Fur wants,
and we will undertake to save you some money on your purchases.

Bowel Troubles

Liver pills, cathartics, mineral waters, often make Constipation worse. They merely irritate the bowels and force them to move—stop taking purgatives and the bowels become "tight" again.

"Fruit-a-tives" are the one certain cure for Constipation

because their action is upon the liver. "Fruit-a-tives" are "liver pills." They stimulate the secretions of bile by the liver. This bile, coming down the bowels to move in the natural, regular way and add completely cure Constipation.

"Fruit-a-tives are fruit juices with tonics and antiseptics added. In "Fruit-a-tives" one atom of bitter replaces one atom of sweet in the fruit juices, forming a new compound which is many times more active, medicinal than the fruit juices could possibly be. 50¢ each—\$2.50 for 6 boxes. At all druggists.

TIMELY TOPICS.

Isn't that mad on Front St. "Some thing there."

The milkmen are smiling. The rain means more grain on the meadows and water in the wells.

We note by our financial reports that money is easier. Perhaps this will enable some of our rich men to become generous to pay their back taxes.

The farmers will soon be routing about too much rain. Everything that hasn't been ruined by the drought will be ruined by the wet.

The Belleville fair is only a few days off. Don't forget that it will be full of sterling features and star attractions. Patronize your local fair, buy a toy balloon and spend money. Fair day comes but once a year.

September seems to have taken June's place as a wedding month.

The London Herald Post declares that the Newfoundland island is regarded as a somewhat tropical of British honor and Imperial effort.

King Governments in the Old Land are not so much interested for just few things, says the Economist.

The Bulletin put rather a dampener on church music, which, perhaps, was not to be expected.

The Louisiana, with average look, will severely shock the steamship record across the Atlantic. Four days and 12 hours is expected to be her record. Her passengers may not be as much interested in the trip as the captain.

Mostly presented to justify their confidence. Forty-six illustrations in an hour, by the way, illustrating a book, that what would be some of our unfortunate, read what got in the Legislature's way?

Some idea of the size of this man.

A REWARD OF FAITH.

The Story of a Church-Town Circle by Lightening.

A member of the circle in Ontario, says the Young's Conversion, brought a small tract of land and erected a church building. Then the question of insurance came up. Mr. Jones, the wealthiest man in the district, who had declined more than half the money offered for his land, was asked to insure the church. He said he did not believe in insurance, but he was willing to build a building. He said he was of the opinion that if it burned down, it would be a great loss to the community.

His view prevailed, and there was no insurance. In a few weeks the building was struck by lightning and almost totally consumed by fire. Another member of the circle, who was a traveling agent for the insurance company, was asked to insure the church. He said he would insure it for \$10,000, but he would not pay more than \$5,000 for the premium. He said he was of the opinion that if it burned down, it would be a great loss to the community.

TIMELY TOPICS.
ORSETS

Three years have been called on by any one else this year.

About three months ago, when the Board of Education, at its meeting, decided to make the school year longer, and then again it may not, but, as matters stand now, something is bound to be done with the primary class of the school in question. A teacher can hardly teach the young idea to shoot when half the scholars cannot sit in to see the light.

As we go along, to say any more about this year? If so the wish, however, had better get busy, before the frost is on the pumpkin.

It will be seen, by the article in another column, that the Tregonville family, at one time, which the Grims made such a hell about, has started to be a more sane, Judge Dorothea, intelligent woman doing, and most of the 80 names struck off together with the names submitted by the Conservatives, were placed on the list.

Teachers who have to keep order in a room in which some boys are present, do not notice, it is said, that their virtues have grown more angelic during the year.

It has looked out that Miss M. would a clean sweep of the present time, we cannot help but wonder if he would again, he has worked with the bunch and knows how much they don't amount to.

AN IDEAL WOMAN.
What does it matter about boys, when you smile in glad and joy? She wears no ornaments in jewelry, she has no time for a hair, she wears no care how old she may be, she is as young as a girl, she is as pure as a dove, she is as sweet as a honey, she is as kind as a mother, she is as good as an angel, she is as perfect as a saint, she is as ideal as a woman.

His Method of Treating a **Tree That Is Decaying.**
When a tree doctor treats a decayed tree he begins by cutting an aperture in the tree large enough to allow him to get at the inside and remove all the decayed wood. This is essential to the success of the operation. When this work has been done the cavity is ready

"I was a new fox to me, but when I came to open up the shirt and looked it over I didn't wonder that they hadn't tried to iron it: one arm was all lost from its socket, and there was a hole punched through one of the insect's legs. The insect vegetable is about four inches long and ten feet. I have seen them first up and others that have been years, and all had the appearance of perfect insect carved in wood.

The English Orphans

BY MRS. MARY J. HOLMES
 Author of "Lena Rivers," "The Homestead on the Hill," "Tempest and Sunshine," Etc.

It was a warm day in the month of June, and the sun was shining brightly on the hills. The English Orphans were gathered in the large hall of the orphanage, and were all looking at a picture which had just been brought in from the country. It was a picture of a large, old-fashioned house, with a garden in front of it. The picture was very old, and the colors were faded, but it was still very interesting to the children. They were all looking at it with great interest, and were all talking about it. Some of them were saying that it was a very nice house, and that they would like to live there. Others were saying that it was a very old house, and that they would like to see it. The picture was of a large, old-fashioned house, with a garden in front of it. HOLDS FIRE ALL NIGHT

The good housewife's fire feels like bestowing upon the Pandora a cheerful "good night."

Why? Because the Pandora always has a nice bed of hot coals as a reward for checking off the dampers closely before retiring to rest.

In five minutes after turning out the lights and having a good, strong fire.

Should she sleep then and dream how the good housewife's fire feels like bestowing upon the Pandora a cheerful "good night?"

The fire-box, flues and dampers are so scientifically arranged that the Pandora can be replaced to hold a fire from 24 to 36 hours.

Pandora can do some things that other stoves cannot do. She has a new look, she is decorated with dreams of making a new fire in the morning.

PANDORA RANGE

Pandora Ventilated Oven is a Real Success

That the Pandora oven is ventilated in reality you can prove for your own satisfaction before a shadow of a doubt.

No indiscriminate mixing and re-mixing of cooking odors in the Pandora oven, consequently there is positively no chance for one article to be tainted with the flavor of another.

The oven never smells close and stuffy, as do the great majority of range ovens.

So scientifically perfect is the Pandora system of ventilation that the air in the oven is constantly being renewed with fresh air and the cooking fumes carried out through another set of vents in back end of oven and from there to smoke pipe.

The general illustration shows how the fresh air is distributed throughout the oven and the smoke and odor escape from the oven.

The Pandora ventilated oven is a real success. When you open the door, the oven never smells close and stuffy, as do the great majority of range ovens.

The system of bookkeeping was so bad, the general says, that the revenue and expenses were so mixed up that it was almost impossible to separate them.

EARTHQUAKES IN ENGLAND.

Uplifts in Great Britain Since Earthquake.

In view of the present risk of property owners to insure against earthquake risks of London, the following article by Prof. Allen, the geologist, on the frequency of shocks in England, will be read with interest.

In geological times Great Britain has had periods when the shores were lifted by the force of earthquakes. In pre-historic times and again in historic times, volcanic activity was so pronounced that islands as it is now in Central America and the West Indies were raised.

In this country the exhibition of volcanic forces has taken two main lines. At the present time they have been raised by the force of earthquakes, by volcanic eruptions, and by the action of the sea.

Although there is no direct connection between volcanic activity and earthquakes, the two are often connected. In fact, the two are often connected. In fact, the two are often connected.

Even in historic times the frequency of earthquakes in this country has been very high. In fact, the frequency of earthquakes in this country has been very high. In fact, the frequency of earthquakes in this country has been very high.

In 1841, during January, at Cornish, there were twelve earthquakes were recorded, and what is more, for Cornish has been a mile degree time for other seismic centers in our islands. We all remember the earthquake of 1856, which really was a great shock in England.

In a chronological record of this sort, the thing we notice is that the records in the other parts of the world are not only very interesting, but they are also very interesting. In fact, the records in the other parts of the world are not only very interesting, but they are also very interesting.

In 1865, on April 15, we had a great earthquake in London. In fact, the earthquake in London was a great earthquake. In fact, the earthquake in London was a great earthquake.

Stylish Fall Garments

The making of Stylish Coats and Costumes is much more than the putting together of so much material and doing so much sewing. It requires artistic taste in choosing style, materials and trimmings to fashion an attractive garment.

For this reason the better class of Garments are now being made in Canada in large Tailoring Establishments under the oversight and supervision of expert designers and with every facility for doing things right. It is because of these facts that we say our Canadian-made Garments for Ladies and Children's Wear are superior in every essential to the imported Garments which are under entirely different conditions being the product of the "Sweet Shops" of Germany.

If you have not seen our Ladies' Fall Coats you will be pleased to demonstrate to you the superior merits of a Canadian-made Garment.
